

LAB #1 – ASP.NET basic

Due Date: **Mon Oct 3 2016 by 23:59.**

References: Read the course's text and notes. This material provides the necessary information you need to complete the exercises.

Instructions: Be sure to read the following general instructions carefully:

- This lab should be completed individually by all the students.
- You could be asked to demonstrate your solution in a class. Submit the code through eCentennial dropbox Lab 1. E-mail submission will NOT be accepted.
- Each day that the assignment is overdue less than 2 days will be mark out of 80%.

Part 1:

You are creating web site that will allow its users to track their home recipes. In this assignment you are to decide on the general design of your web site.

Your web site should include for this assignment at minimum satisfy the following requirements:

1. Home page describes who the “recipe book” works so a user is aware what this web site is about.
2. Home page also has a banner that has navigation links to following pages
 - a. Home
 - b. Recipes – a page that allows a user to see the recipes
 - c. Add recipe – a page that allows a user to add a new recipe
 - d. Search – a page that allows a user to search for recipesYou can add any additional navigation that you wish.
3. Create pages so the navigations in point 2. work. At this point there will be not much content in the pages.
4. Make sure you use Master page(s) to make the site consistent
5. Make sure a user can navigate from any page to the 4 pages outlined in the point 2.

Submission:

Please submit zipped (.zip) version of the folder containing your web site with all of its content.
