

LAB #4 – ADO.NET

Due Date: **Mon Nov 28 2016 by 23:59.**

References: Read the course's text and notes. This material provides the necessary information you need to complete the exercises.

Instructions: Be sure to read the following general instructions carefully:

- This lab should be completed individually by all the students.
- You could be asked to demonstrate your solution in a class. Submit the code through eCentennial dropbox Lab 4. E-mail submission will NOT be accepted.
- Each day that the assignment is overdue less than 2 days will be mark out of 80%.

Part 1:

Modify your Lab 3 to achieve the following:

1. Update Recipes Details page to allow user to Update the recipe. "Submitted by" field cannot be modified.
2. User should pick categories from the dropdown list of already available categories. If the category is not available user should be able to add it from the same page.
3. User should be able to add only as many ingredients as necessary. At any point before saving the recipe, user should be able to change all information for all ingredients for the recipe.

Submission:

Please submit zipped (.zip) version of the folder containing your web site with all of its content.

Make sure that you:

- use proper naming conventions.
- use proper page layout and styling
- properly format the code
- include comment with your name and student number at the beginning, middle and the end of every page.
